POWER TO TRANSFORM

www.californiacore.org

The **Clean Off-Road Equipment Voucher Incentive Project (CORE)** is a new \$44 million project intended to encourage California freight equipment users to purchase or lease currently commercialized zero-emission off-road freight equipment. This streamlined voucher incentive project helps offset the higher cost of zero-emission technology with a point-of-sale discount. There is no scrappage requirement, and additional funding is available for charging and fueling infrastructure and for equipment deployed in disadvantaged communities.

FROM CORE VOUCHER INCENTIVE LIST:

Equipment:	Mobile Power (MPU) and Ground Power Unit (GPU)
Description:	Battery-electric (lithium-ion only)
Base Voucher Amount:	\$400/kWh up to \$300,000 total

<http://californiacore.org/how-to-participate/#Participate>

Equipment User

Criteria for Eligibility:

Any off-road equipment user in California is eligible. If you would like to participate, the equipment you purchase must be domiciled and operate for at least 3 years in California after the voucher redemption date. Equipment users must also submit activity reports for 3 years.

The size of the fleet does not affect voucher amounts, and equipment users have no limitation on the number of vouchers for which they can apply.

Steps for Participating in CORE:

1. Select equipment that suits your needs from the catalog below.
2. Contact an affiliated vendor(s) – they are trained to apply for and process the CORE voucher
3. Provide the vendor with equipment domicile location and other information
4. Purchase your CORE-discounted equipment!

Be sure to review the [CORE Implementation Manual](#)
